COMPANY INTRODUCTION

Simplify the boring part of work

Consulting, software development and training from Budapest, and WorkSmartHub, our own work ticket platform.

WorkWise Solutions Ltd. · founded 2023

WorkWise Solutions

SIMPLIFY THE BORING PART OF WORK

Welcome to WorkWise Solutions

Experienced team

Our team has worked, and works today, for many Fortune 500 companies. We bring that practice to companies of every size.

Practical solutions

We look for the most direct answer to a problem: sometimes a product, sometimes a small script, sometimes a change in how the work is done.

Satisfied customers

Our customers are satisfied with our work and our products, and come back to work with us in other areas too.

We are not just consultants and developers, but **partners in your digitalisation**.

Three services, one partner

1

Strategic consulting

Describe the problem or the challenge in front of you, and we find a solution. We stay with you on the way.

2

Software development

Software answers to your problem: from complete boxed products to small applications and scripts.

3

Training

Courses and lectures in technology fields, for teams that want to keep their skills current.

the same people advise, build and teach, so nothing is lost between the three

How a project with us goes

You always know what is being built, why, and **what it will look like when it is done**.

PART 02

Meet WorkSmartHub

Our own product: work tickets, clients, stock and invoicing for teams that work on jobs for clients.

02

Resources and work, managed in one clean place

Workspaces

Every team gets its own workspace with its own permissions, so it controls its tickets and information.

Work tickets

One ticket per job, from intake to invoice, with client, product, status, parts, work steps and delivery.

Notifications

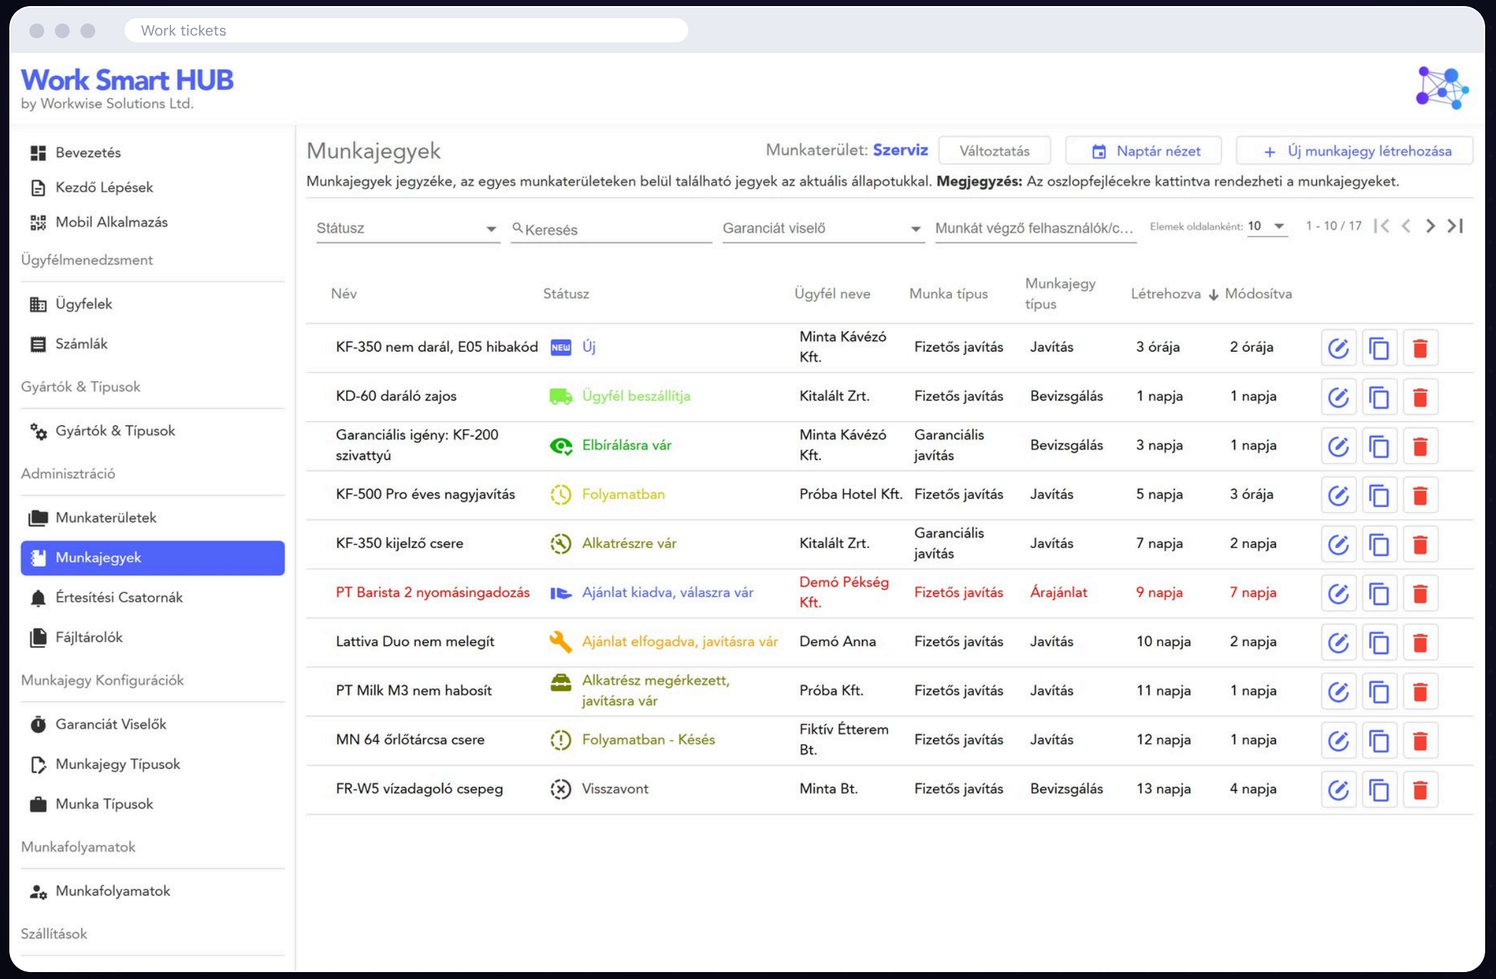

E-mail, Slack and Microsoft Teams messages to the team, and automatic e-mails to the client.

Files and invoices

Every document, picture and invoice with the job it belongs to, in the storage you choose.

Scheduling, following and managing work in a simple form **prevents many problems later**, whatever the size of the company.

What your team sees every morning

1. **Every open job**
   With its status, client and age.
2. **What is stuck**
   Jobs without a change for days are highlighted.
3. **On your own server**
   Windows, Linux, Docker or Kubernetes.

A boxed product: **you install it, you run it, your data stays with you.**

WorkSmartHub in numbers
